*** RSVP by May 5th as Space is Limited**

Program Description

It can be difficult to achieve profound local anaesthesia for dental treatment of mandibular molars. Complicating factors include anatomical variations and the presence of inflammation (pulpitis). This seminar will review some of the variables related to incomplete local anaesthesia and strategies to help render patients pain free for treatment. There will be a clinical demonstration of the IANB, the Gow Gates block, and the Akinosi block.

Date: Wednesday, May 27th, 2015
Time: 6:00-6:30pm Registration
6:30-8:30pm Lecture presentation
Location: Alliance Dental Specialists
1525 Cornwall Rd, Unit 21
Oakville, ON L6J 0B2
905-849-7203

Tuition: Complimentary
CE: 2.0 hours (Category 3)
